

Energy Policy

Commitment

RGE Group is committed to responsible energy management and wherever economically possible will invest in machines and ancillary equipment that give energy efficiencies throughout their manufacturing plants and premises.

Policy

The policy aim is to control and continuously improve the consumption of energy in order to:

- Remain competitive within our markets.
- Improve productivity.
- Avoid unnecessary expenditure.
- Protect the environment both locally and globally.
- Sustain the useful life of fossil fuels for future generations.
- Investigate the use of alternative energy methods.

Objectives

- Create a culture within the group that looks at all areas of energy usage and the potential savings.
- Buy electricity at the lowest cost on medium to long term contracts.
- Use energy in the most efficient manner by managing our working methods.
- Reduce CO₂ emissions wherever practical through reduced energy consumption.
- Investigate and invest in green energy.

Aims

- To actively monitor our energy usage.
- Provide management, information that could affect future decision making.
- To provide feedback to all personnel through environmental newsletters.
- To show achievements against management targets.
