

RGE Y Arm

Gas Assisted Adjustable Arm

General Description

An adjustable arm suitable for ergonomic office chairs. Designed and Engineered by RGE Engineering, the **Y-Arm** represents a technical leap in office furniture component design. The arm is capable of 80mm vertical height adjustable with the lightest press of a discretely positioned central button. The button activates a gas spring; mechanism similar to those used for overall chair height adjustment. The gas spring has been designed by RGE to offer the optimum force and cushion for the ergonomic user.

The arm is produced in a range of colours to compliment the remainder of the RGE catalogue – chrome, black and satin chrome.

- Gas Assisted Vertical adjustment – 80mm travel, infinitely adjustable
