

# RGE704 Chair Base

Image shows RGE704 chair base fitted with RGE602 castors and a RGE229CHR gas lift

The RGE 704 is a stylish polished cast aluminium base, with a unique “twist” design on each leg.

It is an up-lift type base, making it ideal for executive and manager-oriented style chairs with a design edge.

This base is compatible with all RGE castors, however it is recommended that the castors have a tower size of 38mm or less.

All RGE gas lifts are compatible, although drop through gas lifts in combination with small diameter castors need to be checked for ground clearance.

The RGE704 chair base is a larger version of the RGE705 chair base.
